### About Me

Experienced programmer and web developer proficient in HTML, CSS, JavaScript. Strong track record in designing and developing user-friendly websites and applications. Skilled in problem-solving and effective communication. Passionate about staying current with industry trends and delivering cutting-edge solutions that exceed expectations.

### Projects

#### AKsBook

##### Key Points:

- Introducing AKsBook that offers each user a personalized account, empowering them to effortlessly add, update, and delete their own notes.
- Ensuring utmost security, AKsBook guarantees that users can't access each other's notes. Leveraging the power of React, Node, Express, Bootstrap, JSON Web Tokens, and Postman, AKsBook sets a new standard for seamless and protected note management.

#### NewsMat

##### Key Points:

- NewsMat is a dynamic news website featuring separate sections for science, health, technology, education, Bollywood, and more.
- Powered by React, Bootstrap and equipped with infinite loading spinner and News API, it offers an immersive and seamless news browsing experience that keeps you updated not only about what is happening in all over India but the incidents from all over the world.

#### TextAnalyzer

##### Key Points:

- TextAnalyzer converts text to lowercase, uppercase, copy-to-clipboard functionality, counts words and characters, includes audio feature for text-to-speech, and offers a night mode option.

#### Weather App

##### Key Points:

- Created a Minor Project of Weather App using Weather API that shows current weather of known places from all over the world. Created with the help of Node.js, Express.js, Handlebars, Bootstrap and Weather API.

### Achievements

- Leetcode 200+ Problems Solved
- GFG + CODESTUDIO 200+ Problems Solved
- 15+ Major and Minor Projects
- 9.1 College CGPA
